## About PATLITE

Patlite is a reputed multinational company. It was founded in Japan in 1947.

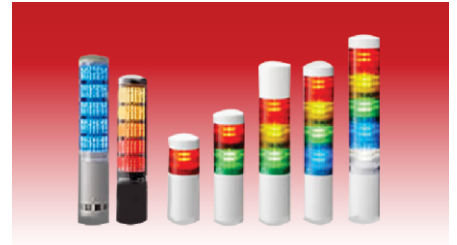

PATLITE is a diversified, global and highly-technology intensive engineering and manufacturing company. The company is a leading provider of innovative LED status indicating lights, sound alarms, visual and audible communication network system and solutions. These products enhance the safety, security and comfort at work and public places.

With more than 600 employees and the wholly-owned sales subsidiaries in USA, Germany, Singapore, Korea, and China, PATLITE is widely recognized as the world's topmost brand in its domain. The company continues to expand its product offerings and services to meet emerging sophisticated needs of industrial, commercial, municipal and governmental customers.

PATLITE's optical, acoustic and electronic engineers have decades of experience developing innovative signalling products with outstanding quality and performance reliability which are required as per the stringent standard of the industry. The company also provides complete solutions in the area of its expertise.
