About Qlight

Qlight is a reputed Korean company. It was established in 1986.

For the last three decades Qlight has been providing visual and audible status indication systems and solutions to enhance customer's work safety and efficiency.

Qlight continues to lead in manufacturing quality products for the industry by establishing a compassionate corporate culture, fulfilling customers' needs, and maximizing manufacturing efficiency. Qlight has met sophisticated needs of demanding customers by adopting technology standards and quality assurance systems.

Qlight was able to maximize management efficiency through the presence of global network of their production and sales sites. Their global teams specialize in short delivering urgently needed items on time, industry's leading customer service, cost competitiveness and consistent quality required for any industrial environment.
